

RONIT AGARWAL

ronit_agarwal@outlook.com · (425) 954-3141 · Bothell, WA · github.com/BoyTiger-1

High school student and independent builder with a 4.0 GPA and a consistent record of state- and national-level placements across technology, data, and business competitions. Ships end-to-end software projects, from ML pipelines to deployed web apps, solo and on hackathon teams, alongside leadership roles that combine technical and financial responsibility. Comfortable owning a problem from research through build to live presentation.

PROJECTS

Wildfire Risk Prediction AI

Python, Flask, HTML/CSS/JS

- Shipped a wildfire risk prediction tool to 50–100+ users by training decision-tree models on NASA and Kaggle geospatial datasets, surfacing risk patterns across temperature, humidity, wind, and vegetation indices.
- Owned the full pipeline solo: sourced and cleaned raw geospatial data, engineered features, trained and validated the model, and deployed an interactive Flask front end that visualizes risk by region.
- Designed the interface around a single question a user actually has, "how risky is my location right now," instead of a static data report.

MindFlow AI

Team build

- Grew an AI wellness coach to 50+ users by personalizing daily guidance: the system tracks each user's check-ins over time and adapts prompts and suggestions instead of serving generic advice.
- Built adaptive machine-learning insights that help users stay motivated, mindful, productive, and emotionally balanced across their daily routines.

FinQuest AI

Team build

- Taught money management to 50+ student users through a gamified financial-literacy platform combining adaptive learning, immersive simulations, and automated financial analysis.
- Let students practice budgeting, saving, and investing decisions in a risk-free simulation before applying the same reasoning to real money.

BrailleVision

Team build

- Made physical Braille readable without specialized hardware for 50+ users: the app reads embossed or handwritten Braille dots from a phone camera or uploaded photo, converts them to English text, and speaks the result aloud.
- Built for real physical pages, both machine-embossed and handwritten dots, rather than only clean digital Braille samples.

Prosperity Empire

Team build

- Turned economic strategy into gameplay for 50+ players: a browser-based financial civilization idle game where progress depends on balancing production, trade, and reinvestment decisions.
- Designed core game loops so players internalize economic tradeoffs by playing, not by reading a lesson.

EDUCATION

North Creek High School, Bothell, WA

Anticipated Graduation: 2028

- GPA: 4.0/4.0 | AP Calculus AB, AP Computer Science A, AP Physics I, AP Seminar, AP CSP, Finance, Intro to Marketing
- Coursework deliberately spans computer science, applied math, and business, the same technical/business combination behind every project and competition result above.

TECHNICAL SKILLS

- Programming: Python, Java, JavaScript, HTML/CSS
- Technical: Machine Learning, Data Analysis, Web Development
- Tools & Frameworks: Flask, Git/GitHub, GameMaker Studio 2
- Finance: Financial Analysis, Business Strategy
- Languages: English (Native), Hindi (Advanced), Spanish (Intermediate)

AWARDS & COMPETITIONS

- 1st Place – Website Coding & Development – Washington FBLA SBLC (Apr 2026)
- 2nd Place – Community Problem Solving, Senior Division – Washington FPS State (Mar 2026)
- 3rd Place – Video Game Design – Washington TSA State (Apr 2026)
- 6th Place – Data Science & Analytics – Washington TSA State (Apr 2026)

- Finalist – Business Finance Series – Washington DECA SCDC (Feb 2026)
- 1st Place – AI Website Project, USAAI National Competition Series (Dec 2025)
- Finalist – USAII Hackathon (Jun 2026)
- 3rd Place Team – Math League WA State High School Championships (Apr 2025)
- Qualified for FPSPI International Conference – 2022, 2023, 2024, 2025, 2026
- FBLA Business Achievement Awards (BAA) – Contributor, Leader, and Advocate Certifications

LEADERSHIP & ACTIVITIES

Future Problem Solving Program International (FPSPI)

Sep 2021 – Present

- Development Director, International Student Advisory Council: own development initiatives for a global academic program with 30,000+ students competing annually and 250,000+ participants over the past decade.
- Contributing writer on the official Guide to FPS, an onboarding resource distributed to the program's 30,000+ annual student participants, translating institutional knowledge into a document a first-year competitor can actually use.
- Coordinate remotely with council members across the international chapter network, planning Advisory Council initiatives on annual cycles and delivering them across time zones.
- Five-time International Conference qualifier (2022–2026) within the same program, giving the council work direct grounding in the competitor experience.

NCHS UNICEF Club

Treasurer, Sep 2025 – Present

- Pitched and secured a nonprofit partnership with Mary's Place to direct a 10-day winter donation drive toward individuals experiencing housing insecurity.
- Mobilized 50 volunteers and 65 attendees for donation and kit-assembly efforts, raising 160+ items (~\$1,300 value) and assembling 54 care kits for 50–60 individuals.
- Built the chapter's annual ASB budget, forecasting \$600 in projected revenue and managing expenses to a \$400 surplus.
- Conducted outreach to 40+ students and coordinated with executive board members and advisors; managed budgeting, inventory tracking, and resource allocation across the drive to maximize impact.

NCHS Math Club

Event Chair, Jun 2025 – Present

- Grew club membership by 22% through targeted outreach and event planning; organized and ran competitions including AMC and NC³ (school math competition).
- Coordinated logistics with faculty advisors and set the competition calendar for the year.

NCHS Chess Club

Culture Manager & Newsletter Editor, Sep 2024 – Present

- Grew club membership by 50%; ran weekly sessions, helped coordinate the school's first chess tournament, and edited the club newsletter (Sep 2024 – Jun 2025).
- Built recurring content and outreach that turned casual attendees into regular weekly members.

FBLA • DECA • TSA

Member, 2024/2025 – Present

- Competed in web development and financial analysis events for FBLA, finance roleplay and written events for DECA, and video game design and data science competitions for TSA, all at the state level.
- Prepared for competitive events through independent research, mock roleplay practice, and iterative revision of technical and written deliverables.

Mu Alpha Theta Mathematics Honor Society

Volunteer Chair

- Lead 40+ student tutors supporting 120+ middle schoolers across two schools, coaching for MathCounts and MOEMS competitions.
- Helped the chapter earn the Rubin Award from National Mu Alpha Theta, recognizing chapter-wide achievement and service.

VOLUNTEERING

Kumon Math & Reading Center of Bothell (*Volunteer Tutor, Jun 2025 – Present*): one-on-one instruction across every level, from early reading and phonics through advanced passage analysis, algebra, and calculus, tracking progress against individualized learning plans.

Schoolhouse.world (*Remote Academic Tutor, Jul 2025 – Present*): free math and history tutoring for students worldwide, making quality academic support accessible regardless of background or location.

PBL Cricket Academy (*Youth Coach, Apr 2025 – Present*): coached youth players in batting, bowling, and game strategy through structured practice sessions building technical skill alongside teamwork and discipline.
